Allowable Subject Matter

2. Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The allowability of the independent claim 1 resides, at least in part, in that closest prior art of record, Gadaud et al. (U. S. Patent 5,052,089) does not disclose or suggest, alone or in combination, a control means can cause the turning motion of a turning tool rest about an arbitrary position that differs from a position of a turning axis by concurrently and synchronously causing the turning motion of the turning tool rest about the turning axis, and a circular-arc motion based on the relative motion of the tool rest main body in a first and second linear direction, in combination with the other elements and features of the claimed invention.

The allowablility of the independent claim 12 resides, at least in part, in that closest prior art of record, Gadaud et al. (U. S. Patent 5,052,089) does not disclose or suggest, alone or in combination, performing the machining of a workpiece by causing a turning tool rest to perform a turning motion about a turning axis, causing a tool rest main body to perform a circular-arc motion concurrently and synchronously with the turning motion of the turning tool rest, and causing the tool to perform the turning motion about the center position, in combination with the other elements and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
